

XM Radio is the best thing to happen to radio in a long time. It is great to be able to go anywhere in the country and still hear the same stations without any static. I pay for the service and am very happy with it. XM plays the songs and broadcast i want to hear not what some record company or Ad company is paying the NAB stations to play. The NAB stations should take alook at why people are not listing to thier Stations anymore and step up to the plate and change. That is what every other business in the world has to do in order to compete. After all isn't are society about "choice" If someone is offering a better product than it is up to you to change your product to meet or exceed the product everybody is switching to in order to get thier business back. It is not to ask for some government hand out instead of doing it yourself. Which is what the NAB is trying to do.
